

Artigrass

Artigrass

Black Hole

Price per Unit (piece): €150.00

A smoke/insecticide-free mosquito trap which simultaneously purifies air and exterminates mosquitoes has been specially devised. This device, using TiO_2 (Titanium Dioxide), decoys mosquitoes with CO_2 (Carbon Dioxide) produced through photocatalyst and with heat such as ultraviolet light. It can be used without fouling or polluting the place of installment, for it works by the method of exterminating mosquitoes through decoying them into the trap. Moreover, it is absolutely harmless on environment, livestock and pets, for it is insecticide free.
