Kiltix Dog Tick Collar

Price per Unit (piece): €19.50

Kiltix gives your dog fast acting, long term tick control.

Kiltix controls Ticks and fleas for up to 7 months.

Kiltix collars contain the active ingredient flumethrin.

Regarded as one of the world's most effective tick killing treatments, flumethrin has a long and successful history in livestock tick treatments.

Flumethrin not only kills ticks, it repels them. Known as the "hot foot" effect, ticks are repelled before they have the chance to attach to your dog.

Kiltix collars work by releasing the flumethrin from the collar as a fine powder which is distributed around your pet's body as it moves.

Kiltix provides cost-effective tick control for your dog.
