

Artigrass

Artigrass

Frontline Combo

Price per Unit (piece): [Call for Pricing](#)

To be used against infestations with fleas, ticks and/or biting lice.

- Elimination of fleas (*Ctenocephalides* spp.) and insecticidal efficacy against new infestations with adult fleas persists for 4 weeks.

- Prevention of the multiplication of fleas by inhibiting the development of eggs (ovicidal activity), larvae and pupae (larvicidal activity) originating from eggs laid by adult fleas for 6 weeks after application.

- Elimination of ticks (*Ixodes ricinus*, *Dermacentor variabilis*, *Rhipicephalus sanguineus*). The product has a persistent acaricidal efficacy for up to 2 weeks against ticks (based on experimental data).

- Elimination of biting lice (*Felicola subrostratus*).

Can be used as part of a treatment strategy for the control of Flea Allergy Dermatitis (FAD).
